Just Arrived today the RAC Isetta for a complete Health Check!!!!

1959 BMW 3-WHEEL ISETTA

Once seen, never forgotten. This distinctive bubble-car is one of just six prepared for daily RAC patrol duty in central London. Behind the front-opening door are two seats but not much room for luggage – hence the equipment carrier on the rear. With RAC badging and a 300cc air-cooled engine, this charming 3-wheeler is in perfect working order – but speed was never its strong point!

Reference – HC 03
